TACTICAL MARITIME OPERATIONS & QUANTUM-SECURED DISPATCH

DISPATCH ID:	IN-NAV-OPS-2026-0842-ALPHA	SECURITY LEVEL:	TOP SECRET // EYES ONLY
ORIGINATOR:	Vice Adm. R. K. Mukherjee, PVSM, AVSM	DISTRIBUTION:	Eastern & Western Naval Commands
DATE OF ISSUE:	05 October 2026 - 0600Z	PROVENANCE:	AegisTrace Post-Quantum Enclave Active
ROOT HASH:	9f86d081884c7d659a2feaa0c55ad015a3bf4f1b2b0b822c	STATUTORY BASIS:	Bharatiya Sakshya Adhiniyam 2023 § 63

1. OPERATIONAL SITUATION & MARITIME DOMAIN AWARENESS

1.1. In accordance with Operation Trident Surge, maritime surface groups and undersea assets deployed across the Malacca Approaches and Bay of Bengal littoral zones are transitioning to **Condition Aegis-1**. All tactical transmissions, acoustic telemetry packets, and sovereign satellite uplinks must incorporate client-side ephemeral dynamic watermarking under the SIH26237 forensic architecture.

1.2. Intercept indicators confirm hostile adversary SIGINT trawlers operating in international transit lanes. Under no circumstances shall classified operational coordinates or electronic warfare frequencies be exported without cryptographic origin attestation. Every release is unique and permanently traceable to the recipient officer.

2. POST-QUANTUM LATTICE KEY MATRIX (ML-KEM-768)

The following battle group flag vessels and command liaison officers have been issued post-quantum decryption parameters conforming to NIST FIPS 203/204 standard specifications:

FLAG VESSEL / RECIPIENT	CALL SIGN	ENCLAVE ID	POST-QUANTUM KEY FINGERPRINT	STATUS
INS Vikrant (Flagship)	TIGER-01	ENC_VIKRANT_01	fips203_768_a91b...34c8	ACTIVE
INS Kolkata (Air Warfare)	COBRA-04	ENC_KOLKATA_02	fips203_768_d44e...91fa	ACTIVE
INS Arihant (Sub-Surface)	SHADOW-09	ENC_ARIHANT_03	fips203_768_88b1...02ee	ACTIVE
Cmdr. Rajesh Sharma (Tactical Ops)	EAGLE-LEAD	ENC_SHARMA_NAV	fips203_768_7a8b...5e6f	ENROLLED
Maj. Priya Nair (Cyber Defense)	SENTINEL-02	ENC_PRIYA_DEF	fips203_768_3a5b...0a1b	ENROLLED

3. SPREAD-SPECTRUM FORENSIC INVARIANTS & ANTI-COLLUSION BOUNDS

3.1. **Zero Server Storage Footprint:** In accordance with naval air-gap security guidelines, the master document remains unified and un-duplicated. Each recipient's secure enclave injects an imperceptible pseudo-noise orthogonal carrier (Barker-13 preamble + 128-bit BCH payload) directly into spatial/DCT coordinates at the instant of decryption.

3.2. **Smartphone Screen-Capture Robustness:** The modulation maintains mathematical survivability across optical capture, severe perspective distortion (up to 45° off-axis tilt), moiré pattern frequency interference, and aggressive image re-compression (JPEG Q≥25 / WhatsApp 90% web compression).

3.3. **Tardos Traitor-Tracing Collusion Defense:** Coalition attacks by up to c=5 colluding recipients attempting linear combination, interleaving, or min/max pixel blending are provably bounded. The Dirichlet evaluation engine guarantees simultaneous detection of all conspiring parties with false alarm probability $P_{FA} < 10^{-6}$.

4. STATUTORY ADMISSIBILITY UNDER SECTION 63, BHARATIYA SAKSHYA ADHINIYAM 2023

Any forensic attribution produced from an unauthorized disclosure of this document is governed by the **Sabha Dual-Officer Attestation Protocol**. The digital certificate rendered by AegisTrace constitutes an admissible Section 63 BSA electronic record, permanently validated by an immutable RFC-6962 Merkle tree ledger.

CHIEF TECHNICAL EXAMINER:	NAVAL PROVOST MARSHAL / JUDICIAL CUSTODIAN:
Dr. V. Raman , Ph.D. (Cryptology) Chief Forensic Scientist, Naval Cyber Command <i>Cryptographic Affirmation: ML-DSA-65 Validated</i>	Capt. S. Sengupta , IN Naval Provost Marshal, Directorate of Naval Security <i>Custodial Affirmation: Chain of Custody Continuous</i>
Digital Signature: ML-DSA-65#RAMAN-842911-PASS	Digital Signature: ML-DSA-65#SENGUPTA-911024-SEAL
